EDUCATION

2025 - Present **KELLOGG SCHOOL OF MANAGEMENT | MCCORMICK SCHOOL OF ENGINEERING** Evanston, IL
NORTHWESTERN UNIVERSITY
Candidate for Joint Degree: MBA, Artificial Intelligence, March 2027
- Involvement: Kellogg Tech, Kellogg AI Club, Tennis Club, Ski and Snowboard Club,
- Honors: Forte Fellow award recipient (awarded based on impact in women orgs)

2016 - 2020 **PURDUE UNIVERSITY** West Lafayette, IN
BS in Computer Engineering with Minors in Business Economics and Entrepreneurship
- Leadership: International Student Peer Coach, Women in Engineering Lead

EXPERIENCE

Summer 2026 **GOOGLE** New York, NY
MBA Product Manager
- Developed a novel Evaluation framework for AI-generated code quality from scratch with projected improvements to code quality at 30%.
- Recruited cross-functional partners across various organizations as early adopters, driving engineering commitment and structured feedback from 5+ Lead Engineers across org boundaries.
- Uncovered root causes of code generation failures through 20+ customer interviews across 10 teams, turning qualitative feedback into a prioritized product spec now being built for 35,000+ engineers.
- Architected a dual-metric model separating model capabilities (completion rate) from business impact (engineering time saved) to justify continued initiative funding.
- Aligned with UX Research to design a rubric establishing the first standardized, repeatable benchmark for engineer satisfaction with internal AI tooling.
- Translated customer findings using data analysis tools and internal AI platforms to uncover insights that were key to long-term strategy for the AI foundations team and guiding decisions for the next year.

2020 - 2025 **SALESFORCE** San Francisco, CA
Software Engineer- II, 2022 - 2025
- Spearheaded development of AI search feature, partnering with cross-functional teams and leveraging a Retrieval-Augmented Generation (RAG) framework to query video calls data points adding 50K+ sales insights
- Secured buy-in from Product VP to build SalesCloud's Video Conferencing product vision by mapping competitor matrix; dash-boarding user habits; building 1- year roadmap projecting 50% higher win rate
- Diagnosed and resolved a critical pre-launch bug through root cause analysis, preventing potential impact on key customers and preserving $1M in service contracts preventing data leaks.
- Partnered with data science to run hypothesis tests on algorithm performance and user engagement, validating model enhancements; improved lead response accuracy and contributed to a 15% lift in sales
- Led post-launch strategy and rollout of Generative AI search feature; accelerated feature adoption by creating Help Docs and delivered a $2M lift in SalesCloud revenue, showcased at Dreamforce attended by 10,000+
- Developed a Sales Mining Dashboard by executing complex SQL-based queries, consolidated 5+ disparate data sources into actionable visualizations, enabling 200+ reps to identify and act on opportunities
- Developed AI agent with Salesforce's AI that integrated across Confluence, Slack etc. to provide conversational answers; achieved 1st place in hackathon, added to product roadmap unlocking potential 10%+ revenue

Software Engineer-I, 2020 - 2022
- Drove cross-team accountability and strategic alignment for 3+ teams by establishing and directing monthly operational reviews; measured team performance using internal monitoring tools
- Championed migration from SVN to GitHub by building and presenting a business case to leadership, forecasting a 20% increase in developer velocity and securing executive sponsorship

ADDITIONAL DATA

- Entrepreneurship & Community: Launched a nonprofit connects 100+ female founders with investors in the Bay Area, developing a database to promote investment in women-led businesses
- Technical Skills: Figma, SQL/SOQL, Agentic AI, LLMs, Deep learning, Java, SQL, Vibe coding, Stakeholder Management
